Birthdate: 13/12/1992

Address : Sant Cugat del Vallès (Barcelona)

Profile

Since I can remember I have been passionate about technology. Now I am 31 years old and I can say that I fulfilled my dream of using my knowledge in technology to help people and companies grow together.

I love working on interesting projects where I can program side by side with my team in order to write object-oriented code cleanly and efficiently.

Specialized in fullstack web development, APIs and web services from the backend in .NET and SQL server/MySQL to the frontend with AngularJS, HTML and CSS.

Github and Azure Devops have always been present in recent years.

Professional experience

09/09/2019 – present: *ALTEN Group*

As a consultant I had the opportunity to work with a couple of important clients:

- **31/03/2020 - present: *RBA***

  RBA has 15 digital magazines (such as Lecturas or Revista Clara), so, as a .net engineer, I am working, together with my team, on the continuous development of a custom CMS in VueJS for the frontend and in .NET for the API for each one

of them. At the same time, we take care of the correct development of the websites and their positioning.

- 09/09/2019 – 31/03/2020: *Grupo Planeta Sistemas:*

  I worked as a .NET programmer developing modules in Microsoft Dynamics for clients that required a personalized CRM. I was also in charge of writing several stored procedures and cron jobs. This helped me learn more about how Microsoft works.

- 01/10/2018 - 01/09/2019: *Ferrer & Masson S.L. Consultora E-commerce:*

  As a junior developer I was working in an e-commerce consultancy that sold personalized PrestaShop and Odoo for clients and with which I was able to know about the web world.

- 01/09/2010 – 01/08/2012: *G4B, S.L. de Ingeniería y Consultoría Energética:*

  I started working in the family business doing IT management tasks, help-desk, and Microsoft Office tasks. Here I started to learn how a company works and its technological needs.

Technical skills

- Advanced programming in C# with the .NET framework.
- Strong knowledge of Github and Azure Devops.
- Good knowledge of AngularJS, Vanilla JS, JQuery and CSS.
- Knowledge of PHP, Java and Python.

Studies

Title: Técnico Superior en Desarrollo de Aplicaciones Multiplataforma

2019 – present *UOC - Computer Science Engineering*

2016 - 2018 *Salesians de Sarrià – Multiplatform Application Development.*
